

Electric Pricing For Your Home

We offer 11 pricing options
to best suit your lifestyle

DTE

Most customers choose the ease and predictability of the Residential Electric Service Rate, but DTE has more options to consider. Find what is right for you, based on your budget, lifestyle and energy needs.

I want to save on my air conditioning bill.

Interruptible Space Conditioning Service Rate (CoolCurrents[®]) – you save on the cooling portion of your bill by allowing DTE, when demand is high, to briefly cycle on and off your air conditioning unit (includes air source heat pumps).

I have an electric water heater in my home.

Interruptible Water Heating Service Rate – this lower rate for electric water heater usage allows DTE, when demand is high, to briefly cycle on and off the heating elements of your water heater.

I am a senior citizen.

The Senior Citizen Provision Credit – offers a \$3.75 per month savings to eligible seniors who are head-of-household and 65 years of age or older.

- There is no kWh usage requirement to qualify
- The Senior Citizen Provision credit means a savings of \$45.00 per year

I want security lighting near my home.

Outdoor Protective

Lighting – get dusk-to-dawn, protective security lighting using existing DTE utility poles.

dteenergy.com/oplres

I want to support clean, affordable renewable energy here in Michigan.

MIGreenPower – for customers who want to participate in DTE's solar and wind parks and help minimize their impact on the environment.

dteenergy.com/MIGreenPower

I want to generate electricity using renewable resources.

Distributed Generation – get credit for electricity from solar or wind that you send back to the grid. dteenergy.com/dg

Time of Day Options

Save on your energy bill by using energy offered at lower prices during specified (off-peak) times of the day.

I'm able to shift a portion of my electricity use to the evening and early morning hours.

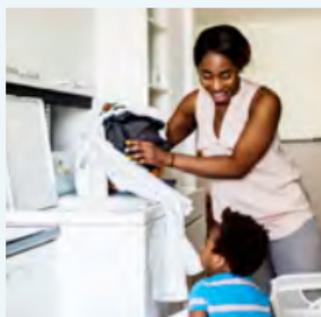

Residential Time of Day Rate

– save when you use more electricity during off-peak hours: weekdays before 11 a.m. and after 7 p.m.; and all weekend long.

I can shift a major portion of my usage to lower price hours.

Dynamic Peak Pricing Rate

– reduces your electric rate by almost half on nights and weekends. Want to save even more? Combine this rate with a free, smart, Wi-Fi enabled thermostat by joining SmartCurrents™. To enroll, visit dteenergy.com/smartcurrents

I'm interested in a Geothermal system to heat and cool my home.

Geothermal Rate Option –

saves you money when your equipment operates during designated off-peak hours: weekdays before 11 a.m. and after 7 p.m.; and all weekend long.

I drive an electric vehicle and can be flexible when I charge.

Electric Vehicle Rate – you save when you charge your electric vehicle during off-peak hours: weekdays before 9 a.m. and after 11 p.m.; and all weekend.

Manage your energy use with DTE's energy efficiency programs and rebates at dteenergy.com/saveenergy

Factors that impact your bill

Did you know? There are many factors that drive energy use in your home. Here are the four key factors that will determine how high or low its energy bill may be.

Usage

Did you remember to adjust your thermostat setting? The primary factor that impacts your monthly energy bill is usage – the amount of energy used during a billing cycle.

Weather

A couple of days of extreme weather – hot or cold – can make heating and cooling equipment run longer, increasing your energy use.

Household changes

More people in the house often means more lights are turned on and appliances are used more, or you may even make adjustments to the thermostat to make more people comfortable.

Days billed

Fewer days in the billing cycle typically results in a lower energy bill, compared to a billing cycle with more days.

So, next time your bill comes, take a few minutes to consider the impact these factors may be having on your energy bill.

We're committed to keeping prices affordable, while investing to improve reliability

We're integrating new smart technology to achieve greater energy efficiency, reliability and better service. Our plan calls for an investment of nearly \$1 billion a year on infrastructure upgrades and equipment replacement throughout our Southeast Michigan service territory. Work we're doing includes:

- trimming overgrown trees along power lines
- replacing and upgrading utility poles
- adding sensors and other best-in class technology to make the grid smarter
- upgrading existing substations and building new ones to support economic growth

And, DTE recently committed to reducing carbon emissions by at least 80 percent by 2040. Read about DTE's commitment at dtecleanenergy.com
