UPDATED: VOLUNTARY REQUEST FOR REDUCTION IN FLOWING SUPPLY

07/21/2020 UPDATE:

The scheduled outage is nearing completion with an in-service date of August 7, 2020. Listed below are the projected curtailments for the remainder of the project:

- **July 27 – 31:** A section of the pipeline that makes up the Willow segment will be taken out of service and the following receipt locations will be constrained: ANR-WILLOW RUN (MAP #9038), PEPL-MCON (MAP #9028) AND NEXUS-YPSILANTI (MAP #9219). **No receipts or deliveries will be accepted at Northville MAP#9423/9023.** This is a request for a voluntary decrease in gas supply through the Willow segment. If volumes nominated exceed system capability during this time, cuts will be made per Section 3.2 of the DTE Gas Rate Book.
- **August 1 – 7:** The Willow segment will have reduced capacity; however, curtailments are projected to be minimal.

05/18/2020 UPDATE:

Due to the COVID-19 Stay Home, Stay Safe executive order, this project will be extended. Currently, maintenance is expected to go through July, with normal operations expected to be restored by July 31, 2020.

03/27/2020 UPATE:

The scheduled outage below has been delayed and the new start date is April 6, 2020. Due to the COVID-19 pandemic and the current Stay Home, Stay Safe executive order from Governor Whitmer, there could be work stoppage to this project which would prolong the estimated 10-week timeline. As more information becomes available regarding the timing, DTE will post updates as appropriate.

03/16/2020:

Due to pipeline maintenance beginning April 1, 2020, volumes moving through the Willow segment north of the following receipt locations will be constrained: ANR-WILLOW RUN (MAP #9038), PEPL-MCON (MAP #9028) AND NEXUS-YPSILANTI (MAP #9219). Actual capacity will vary depending upon pipeline operations, weather, and market conditions. Maintenance is currently estimated to require 10 weeks, with normal operations expected to be restored June 10, 2020. This is a request for a voluntary decrease in gas supply through the Willow segment. If volumes nominated exceed system capability during this time, cuts will be made per Section 3.2 of the DTE Gas Rate Book. PLEASE NOTE: This is not a request for EUTs to reduce usage.

DTE request that customers and gas suppliers proactively watch for updated operational notices on DTE's eNominator system, Gas Noms Webpage and direct emails during this critical period.

Please contact your gas account manager with any questions. For scheduling questions, please contact Gas Nominations at 1-833-383-6667.
